Pregnancy and new born price list

# Welcome

## **Pregnancy Photography**

Having a pregnancy photography session with me is a fantastic way to preserve such an important moment in your life. My expert use of lighting and composition ensures that I will create beautiful images of your body and your "bump".

Pregnancy photography is a way to celebrate the baby you will shortly meet and they will provide memories that you will look back on very fondly in the years to come. I am more than happy to include partners and siblings in my photography sessions to create superb family photographs.

I like to shoot at around eight months to get the best results, and I do get booked up in advance; if you would like to ensure your session with me please do book in as soon as possible and we can look to pencil in your shoot date.

Your images will be available to view on my website in a password protected gallery and I offer many styles of wall products that will display your artwork beautifully.

## **New Born Photography**

New born photography is a wonderful genre to work in. Your little one will grow and develop so fast and new born photography will give you an opportunity to preserve this special and fleeting moment.

I like to shoot new born work at your house and I have many rugs, blankets, props and accessories to ensure there will be a variety of images for you to choose from.

I especially like to shoot your little one in the protective arms and hands of parents, this is an image I never tire of producing.

Your images will be available to view on my website in a password protected gallery and I can offer a huge variety of wall products and albums to display your art work.

It is essential to book your session early, as the window of opportunity to produce images such as these only exists for around 2 weeks. To secure your booking, I would advise contacting me at your three month scan so we can pencil in your shoot date.
